Who is the Ideal Candidate?

- If you have receding hairline.
- If you have thinning hair, and your hair loss is not the result of any treatment or stress.
- If your hair loss is permanent but you have adequate hair growth or sufficient hair follicles which can be used for transplant.
- You know that treatment may take several months of even a year.
- If you have bald spots.

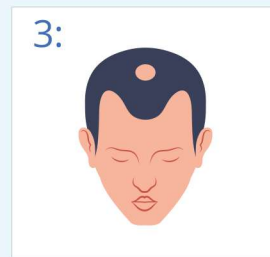

Stages of Hair Loss

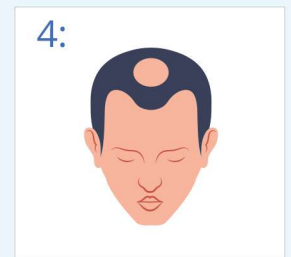

1: Marginal or minimum hair loss.

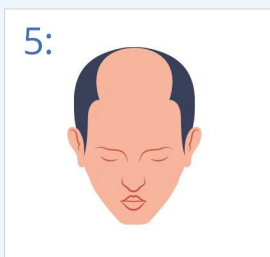

2: Hair loss near the temples.

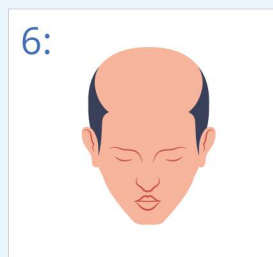

3: Preliminary stage of hair loss where treatment is necessary for recovery.

4: Hair thinning and evident bald patches were observed.

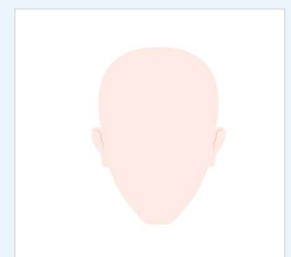

5: Hair thinning of the crown is with the initial stages of baldness.

6: The top or crown area of the head is completely bald and hair thinning at the sides.

7: The last stage of baldness with minimal hair seen on the scalp.
